I have tasked our SERAS contract to give you assistance through their team subcontract SRC. SRC, as you know, has an office in Denver and that seems to be the most expeditious way to give you the support you need. I have given permission to SRC to call you directly to better understand your needs. SERAS (SRC) will call me and I will write a site specific work assignment for the support you request. SERAS (SRC) will keep me in the loop through cc of the communication between you and SERAS (SRC). Please keep me in the loop if you are having any challenges and I will be glad to work immediately to resolve any issues.

Good Luck... Don't burn

Hey Dave

As we discussed, I would like some support for developing presentation materials for the Gold King Incident. It is anticipated that public meetings will occurring on short notice. Data manipulation and calculations may be necessary. Please let me know if more information is needed to task SRC.
